The Chairman invited Ms.Naphamat Phlaingam – Chief Financial Officer, to present the details of the Statement of Financial Position and Statement of Income for the year 2024 ending December 31, 2024, that the auditors have audited. The summary of the Financial Performance is as follows:

Statements of Income for the year 2024

The revenue overview of the Company and its subsidiaries over the past five years shows a steady recovery following the significant impact of the COVID-19 pandemic in 2020 and 2021, which notably reduced revenue. In 2024, the Company's total revenue reached 1,256.54 million baht. Although this represents a 2.5% decline from 2023, the Company has consistently maintained its revenue above 1,200 million baht.

Upon examining revenue by business segment, it is clear that the Company's primary source of revenue in 2024 was the event business, which generated a significant 780.82 million baht, accounting for 62% of total revenue. At the same time, the equipment and system installation business played an essential role in providing consistent revenue stability for the Company. Looking ahead, the Company plans to develop its various business segments and increase the revenue contribution from these areas to reduce the risk of relying solely on one primary revenue stream.

In 2024, the group of companies reached a gross profit of 272.41 million baht, representing the highest level achieved in the past five years. This success is attributed to efficient cost management and the operation of high-margin service businesses. It is a direct result of careful planning and effective execution by the management team, particularly in terms of cost control and delivering high-quality work.

In 2024, the group of companies demonstrated a continued trend of financial recovery, as reflected in key financial ratios. The gross profit margin rose significantly to 22%, up from 16% in 2023, showcasing effective cost control and the successful adaptation of the service business. Although the net profit margin remained at (7%), it marked a notable improvement from the negative 13% in 2023.

In terms of financial liquidity, the cash conversion cycle improved to negative 6 days, indicating positive progress through more efficient working capital management and faster customer payments. Regarding debt structure and solvency, the company's debt-to-equity ratio was 1.83 times, which requires careful monitoring and management. The company is committed to maintaining financial stability, and while the current ratio in 2024 stood at 0.10 times, there is a plan in place to restore it to a normal level of 1 time as quickly as possible.

In 2024, the Company's cash flow from operating activities showed a clear recovery, with net cash exceeding 150 million baht, a significant improvement from the negative level in the previous year. This reflects the business recovery and the effective management of cash flow from core operations. Regarding

investing activities, the Company continued to invest in projects related to equipment and work systems to enhance service capabilities with modern technology, meet future customer needs, and build a sustainable competitive advantage. The cash flow from financing activities decreased due to the restructuring of debt management and prudent capital management. The Company is actively working to generate profits, strengthen its capital base, reduce debt, and enhance liquidity. In 2024, the company partially repaid its outstanding debentures in the amount of 30 million baht, leaving a remaining balance of approximately 50 million baht, which is scheduled for final repayment in November 2025.

In summary, the operating results for the year 2024 show that the Company achieved continuous growth in revenue and gross profit. Although the net profit remained negative, the Company is dedicated to returning it to positive territory by implementing key strategies, including effective cost control, expanding services in high-potential segments, and practicing prudent cash flow management. The Company remains confident in its business potential and long-term growth trajectory, aiming to generate stable and sustainable returns for shareholders in the future.

This would enable shareholders to hear the Company's performance results, receive various explanations, and have the opportunity to engage with the Board of Directors. It is important to note that organizing an e-AGM may incur additional expenses, so it will depend on the Company's readiness to implement this option.</p> <p>2. Upon reviewing the Form 56-1 One Report for the year 2024, it was observed that the Company has made significant progress in its sustainability efforts across the ESG dimensions and in the preparation of related data. Should the Company be able to compile sustainability data comprehensively and systematically, it may have the opportunity to be selected as a security in the ESG-related indices.
